Tidelands approved our application in about 3 min; one member appeared to have been briefed by Ella and asked questions about whether it should be a complete removal...

I'll get answers for your other questions

What you said sounds fine.

How did the tidelands meeting go last week?

Also, I'm going through the final design, but is all the supporting information included in the design? Specifically, all the pore water data and seepage measurements? It's not obvious to me where to look for this information. Also, is the CWCW summary data you sent to DEP included? Or will all this be in the tech memo you're submitting tomorrow?

The other PAs want to see the data. I could send them what you sent to NJDEP, or wait until tomorrow if the tech memo will be more complete.

Thanks
